Profile

I am a third-year international student on the BSc (hons) Business Information Systems programme at Atlantic Technological University (ATU) Galway. As part of my course, I have developed IT skills such as business analytics and database management. I have studied away from home for 8 years, developing myself as a global citizen, and accumulating many experiences and soft skills such as independence and appreciation of different cultures. I am seeking work placement commencing January 2023. I am interested in data engineering and analytics, with a goal to specialise in data science, AI and machine learning.

Education

2020 – 2024

BSc (H) Business Information Systems
Atlantic Technological University Galway, Ireland
Key Modules Year 3: Business Analytics, Web Technology, Data Modelling, Project Management, Leadership & Change Management
- Expected result: 1.1

2014 – 2017

Singapore-Cambridge GCE O-Level
Catholic High School, Singapore
Grades: English (A1), Mathematics (A1), Additional Mathematics (A2), Physics (A2)

Projects

Website Development | Year 2 (Individual)
- Aim: To create an interactive website from the ground up using HTML, CSS and JavaScript.
- Technologies used: Adobe Dreamweaver, Visual Studio Code
- Description: I created two separate websites: informational and interactive, which had different objectives. The informational website had more emphasis on HTML and CSS while the interactive website had more emphasis on JavaScript.

Udemy 100 Days of Python Course | Ongoing (Individual)
- Aim: To develop my Python programming skills
- Technologies used: GitHub, Anaconda, Visual Studio Code, PyCharm
- Description: I am currently taking an online course which covers the entirety of Python, from the beginner to professional level. Learning outcomes include web development, game development and data science applications using Python. I expect to complete this course late December 2022.

Portfolio

Work Experience

China Garden | Front of House
October 2020 – December 2021

Responsibilities
- Taking orders from customers in-store, through calls and food delivery applications, as well as collecting cash for takeaway orders.

- **Problem Solving**
  - Applied new skills throughout the 100 Days of Python course, with a strong emphasis on sourcing solutions and information from online resources such as Stack Overflow.

Awards and Honours

ASEAN Scholarship for Malaysia | Offered July 2013
- I was offered a full 6-year scholarship from the Ministry of Education Singapore to complete my O-Level and A-Level courses in Singapore.
- This is a competitive scholarship with hundreds of applicants across the various South-East Asian countries. However, I rejected this offer in favour of the school-based scholarship.

School-Based Scholarship | Awarded July 2013
- This full 6-year scholarship was a direct admission into a school that was affiliated with the school I was attending at the time, which I accepted over the ASEAN Scholarship.

Achievements and Interests

- Independent and resourceful having studied abroad alone since 2014.
- Attentive and creative from my experience as a symphony band member from 2010 to 2019, without having any prior music background and being committed to learn and appreciate the Arts.
- Leadership development as Section Leader in concert bands in 2012, 2016 and 2019.
- Engaged in various voluntary works in Singapore, such as joining a community band to make public performances, volunteering to organise events in libraries and planning a day of activities for the elderly in an elderly home as well as students at a vocational institution for deaf youths.
- Cooperative and possess good conversation skills from Project Work in A-Level, a subject where a group of 4 embark on a 9-month long project to address national issues in Singapore. The outcome of the project included a 3000-word report with proposed solutions to address food waste.
